Re: EPA's Review of May 2014 Preliminary Assessment
Northport Medical Center

Dear Mr. Moschitta,

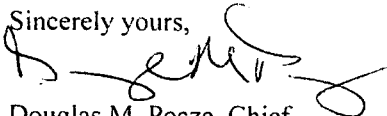

This letter pertains to the United States Environmental Protection Agency's (USEPA) review of the Preliminary Assessment report (May 2014) submitted to our office for the Northport Medical Center. As you know, the subject facility was listed on our Federal Agency Hazardous Waste Compliance Docket (docket) in Docket Update 25 (originally published in the Federal Register November 6, 2012 but was subsequently replaced by the March 18, 2013 publication). Listed below is our site assessment determination along with the rationale for our site decision.

The facility was placed on the docket due to its reported Large Quantity Generator (LQG) status. The facility only occasionally generates enough "acutely toxic waste" to warrant this classification. The waste materials are bench-scale and generated from the research laboratories. All of the waste is removed within the 90 day limit from the property and transported to an appropriate hazardous waste facility. Waste generated in the past and disposed of at the facility was on a portion of the property that has since been transferred from federal ownership to the municipality and the county, and became parkland. Therefore, all waste areas were removed and remediated in either 2001 or 2010.

Based on the above mentioned information, we have assigned a designation of No Further Remedial Action Planned (NFRAP) which means no additional steps will be taken by EPA under the Superfund program at the site, unless new information becomes available that warrants re-evaluation. However, this decision does not preclude further action at site by another EPA program, the State, or other Federal Agency.

If you have any questions, please contact Ms. Helen Shannon, Region 2 Docket Coordinator at (212)637-4260.

Sincerely yours,

Douglas M. Pocze, Chief
Federal Facilities Section
